

Application

- Companion luminaire to the 850 suspended linear luminaire
- Wall mount indirect luminaire with forward throw optics
- · Corridors or small offices needing indirect lighting
- Hospital corridors

Finishes

- Housing: unpainted/unfinished formed steel housing in solid or perforated patterns
- Customer to source local powder coating facilities for housing and die cast aluminum end caps

Reflector (optional):

- · Enhanced forward throw aluminum
- · Also available in white forward throw steel

Lamping Options		
Т5	T5HO	
(2) 28W (4')	(2) 54W (4')	
(4) 28VV (8')	(4) 54W (8')	

Check with factory for LED and LED/fluorescent applications.

Features

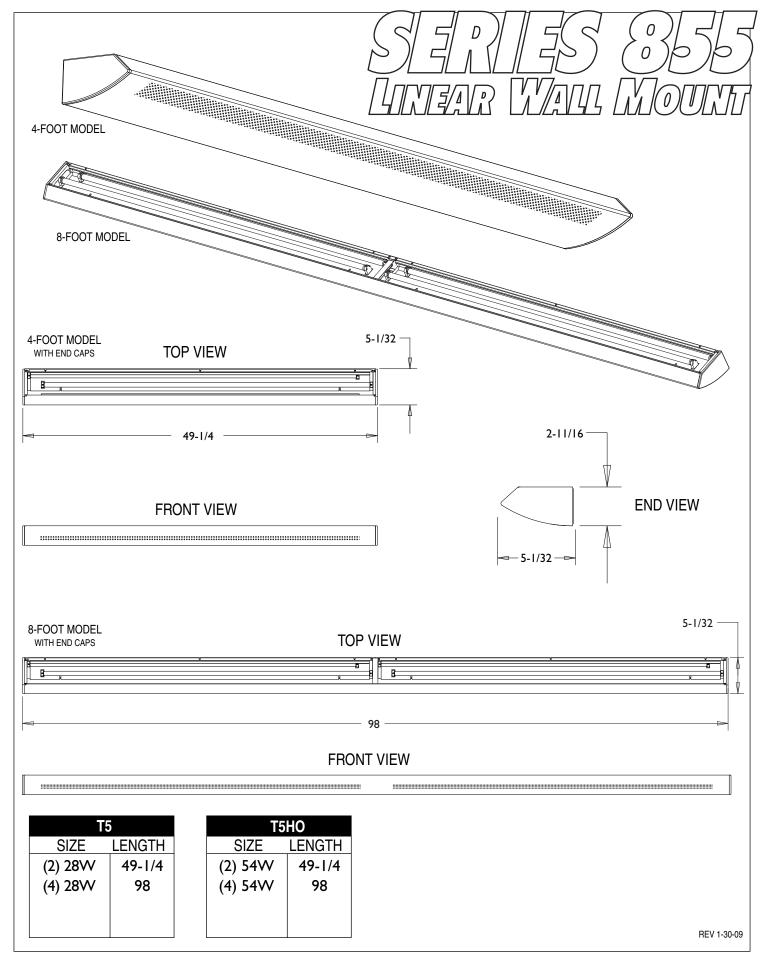

- Units are shipped with die cast aluminum joiners installed for structural continuity and for attaching other units for continual runs or end caps.
- The units mount to a wall bracket that compensates for uneven surfaces and allows for recessed electrical boxes. The wall brackets are 48-3/4 long and two are needed with an eight foot housing.
- A computer designed optical system maximizes the output of (2) T5 or (2) T8 (Series 885) lamps, producing minimal back-lighting on the wall and maximum forward throw.
- Ballast mounting assembly allows for easy installation separate from housing and then installs with two fasteners.
- Architectural die cast chamfered aluminum ends are available for a complete designer look without exposed fasteners.

Optional Features

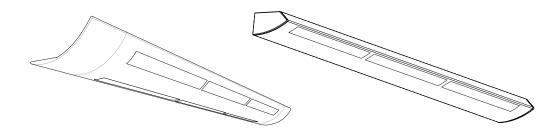

Custom modifications in the physical specification are available for a complete designer look. Check with the factory for motion/sound sensors.

Packaging	4'	8'
Bodies per skid	64	64

PAINTING PROCEDURES FOR SUSPENDED & WALL MOUNT LINEAR FIXTURES

SEND THESE PROCEDURES WITH FIXTURES TO THE PAINTER

PROCEDURES:

- 1. Make sure end caps are mounted to the body <u>before</u> painting.
- **2**. If no end caps are needed, make sure you mask off the outside face of the joiner before painting. This will assure a good fit between joiners.
- **3**. Make sure the painter is aware that the body is steel and the end cap and joiner are aluminum cast.
- **4.** The painter should check the gap between the end cap and joiner to make sure there is a good fit and that there are no gaps before painting. Close gaps by pushing the end cap towards the body.

Adam Metal Products Company Series 855/885 Assembly Instructions

ASSEMBLY INSTRUCTIONS

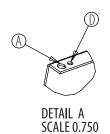

- Mount wall bracket to wall using a level or laser making sure bracket is level.
 NOTE: If running consecutive fixtures, mount wall brackets butting up to each other.
 Use two wall brackets for one 8-foot fixture.
- 2. Mount body assembly to wall bracket by inserting slots into tabs on wall bracket. Attach body assembly using #8 x 1/4 self-tapping screw (A). See Detail A (two 4-foot wall brackets for one 8-foot assembly). NOTE: When using an 8-foot assembly, you need to attach the center bracket between the two wall brackets using #8 x 1/4" sheetmetal screws (D). See Detail A.

 Use (2) 4-foot wall brackets for one 8-foot assembly.
- 3. Attach end caps to body assembly using 8–32 x 1/4" screw (C).

 NOTE: If joining another fixture, use 1/4–20 x 1" screw with a flat washer and nut in place of the 8–32 x 1/4" screw (C).

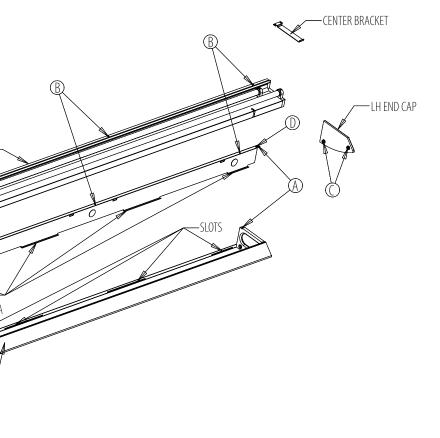

RH FND CAP

4. Install ballast tray assembly to wall bracket using #8 x 1/4" sheetmetal screw (B).

HARDWARE LIST (by others)

- (A) #8 x 1/4 Self Tapping Screw (2 pcs.)
- (B) #8 x 1/4 Sheetmetal Screw (3 pcs.)
- (C) 8–32 x 1/4 Machine Screw (used with end caps) (2 pcs.)
- *(C) 1/4-20 X 1 with Flat Washer & Nut (Attaching Fixture) (2 Pcs)
- (D) #8 x 1/4 Sheetmetal Screw (2 Pcs.)
